

Science Teaching

- A PhD course preparing you for teaching

Are you about to teach for the first time as a PhD student? Have you experienced challenges during your teaching? Would you like to discuss and develop your teaching practice?

If so, *Science Teaching* - a 5 ECTS course for PhD students at Science and Technology - is perfect for you!

The course prepares you to work as Teaching Assistant at the university and is mandatory for all new PhD students who have teaching obligations as a part of either their employment as a PhD fellow or as a student teacher.

You will learn how to use specific tools in your own teaching to support student motivation and learning through active preparation and participation. →

Course facts

- ECTS credits : 5 ECTS
- Language: English
- Target group: PhD students, Science and Technology, AU
- Time: Q1,Q3
- Capacity: 75 participants
- Place: AU Campus, Aarhus

The course consists of four course days where several teaching methods will be demonstrated and discussed.

During course days, you will have the opportunity to try out several teaching tools and techniques before using them in your own teaching.

You can tailor the course so you can specialize in the specific type of teaching that is most relevant to you; e.g. small classroom teaching (TØ), laboratory teaching (LØ), lecturing, outreach or field trips. Both traditional and online teaching will be addressed.

Introduction to Science Teaching will be offered biannually in September and January by Centre for Science Education and the Graduate school of Science and Technology, Aarhus University.

↑ Through collaboration with fellow PhD students, you will practice and develop your own teaching skills.
